CONFIRM

BACK

From the previous design to this one, I did not change anything aesthetically, but I added JavaScript functions to allow the page to change as the user chooses their preferred date and time. For example, depending on the date and time that the user chooses on the left side of the screen, the summary of the appointment on the right side will update automatically.

I added a COVID-19 Test Results page, which shows the history of the user's Tartan Testing results. I decided to display it in a table setting, as it can easily organize the information necessary for the user. Furthermore, when clicked on, the button in each row opens a popup, or modal, to show information about test results.

After clicking on the view buttons, the following modal appears:
